SIMPLE AND QUICK STRETCHER BARS FOR CANVAS FRAMING

LFP
print it large!

Wunderbars is a revolutionary framing system for creating canvas wraps. These easy to use bars provide a quick and simple solution for stretching canvas without the need for specialist tools or skills. The unique design of the bars, ensure that regardless of the hanging environment the canvases will remain under constant tension, eliminating sagging and rippling.

Wunderbars constant tension stretcher bars are easier to construct and stretch than traditional stretchers. Each bar is precision machined so that when the frame is put together it is square eliminating the need to constantly

keep tapping it to keep it square before stretching.

Unlike other stretching systems there is no need for expensive machinery or devices, the only tool needed is a staple gun. Wunderbars' unique self tensioning corner blocks ensure that, there's no more sagging canvas, it always stays tight and will contract and expand to the room's temperature and humidity.

The wood used for Wunderbars are from sustainable sources, which are FSC and PEFC certified.

► **Wunderbars White**

The most popular range in the Wunderbars family, Wunderbars White comes in a slightly smaller profile at 33mm x 46mm, however still uses the same spring loaded system of the other Wunderbars profiles.
